Bot Insight: Your Bots Have a Story to Tell.

Bot Insight is the only embedded analytics platform, designed specifically for RPA, which provides Business and Operational Data, in automatic dashboards, without any integration.
YOUR BOTS AREN'T JUST WORKING TIRELESSLY TO GET THINGS DONE.
They're collecting data. And that data tells you stories.
Automation Anywhere® software robots (bots) automatically capture data on every business process they touch.

How consistent is our cash flow?
How long does it take to onboard a new employee?
How many inventory turns did we do last month?
We’re cash-rich because our new product has taken off.
We need to accelerate recruiting to stay on top of our development plans.
We must boost production to keep up with demand.
How many invoices were paid this quarter?
How many past-due accounts do we have now?

GET INSIGHT INTO THE HEART OF YOUR BUSINESS
Productivity: It takes 2.5 FTE hours to process a P.O.
Efficiency: We can process 1,000 invoices a day
Cost: We reduced production costs by 30% last quarter
Revenue: Our new service offering is our most profitable

“Bot Insight gathers and logs any tagged data... with no need to consider prebuilt models, schemas, or other systems. Dashboards are created automatically using the results of the data profiled. These can be used to drill down for further analysis and insights into the data presented.”
— Maureen Fleming
IDC

“Bot Insight covers the entire spectrum of work, from data gathering to visualization, thus eliminating the burden on IT for logging, tagging, and visualizing data and, in turn, greatly reducing cost and time to value.”
— Nancy Jamison
Frost and Sullivan

See real-time customer data such as mortgages processed by marital status or by type of mortgage such as fixed or variable.
GET REAL TRANSPARENCY INTO HOW YOUR BOTS ARE PERFORMING

Bot Insight helps you effortlessly monitor and manage your digital workforce.

Bot Insight arms you with our “Center of Excellence” (CoE) dashboard that tracks the ROI of your RPA investments by process or department.

Once you deploy Bot Insight in your department you will instantly see the value of your RPA. Other departments will be lining up to deploy RPA.

By applying analytics to that data, you get to hear extraordinary stories about your business. And with Automation Anywhere’s Bot Insight™, you can hear—and act upon—these stories.

Bot Insight’s embedded analytics give you real-time answers that are always up-to-the-minute fresh.

CoE dashboard visually displays ROI by department or process.

Each Step in the RPA Journey has Unique Challenges

START
0-25

• Use automatic CoE Dashboard to win supporters
• Calculate ROI in terms of hours, dollars, FTE, bot, department, or process
• Automatically summarize project value
• Share real-time data using the Automation Anywhere Mobile app

SCALE
26-50 Bots

• Generate any dashboard on any automation on day 1
• Get actionable, real-time intelligence
• Get insights into which parts of the RPA program are working
• Leverage both operational and business intelligence

TRANSFORM
50+ Bots

• See the performance of an entire process automatically in a CoE Dashboard
• See the ROI of the entire program over time
• Compare your performance against industry benchmarks
• Answer questions on the fly in meetings using the App

GET EVERYONE ON THE SAME PAGE

Speed up your digital transformation journey with Bot Insight

• Only embedded analytics designed for RPA
• Automatic ROI in the CoE dashboard
• Business and Operational Data
• Automatically in dashboards
• No Integration

If you are serious about RPA, you need Bot Insight.
