

IQ Bot

AI that Reads and Processes “Dark Data”

DEMOCRATIZING INTELLIGENT DATA PROCESSING

IQ Bot™ is the only AI-driven solution that can be easily set up and used by business users to automatically read and process a variety of complex document formats and emails, faster.

KNOWLEDGE WORKERS CONFINED TO ROBOTIC WORK

Businesses today are well on their way to automating processes that draw from structured data sources. However, 80% of your company's data is "Dark Data"—information that is difficult to access, undigitized, and unextractable using traditional RPA-only solutions.

Large variations in document formats and the highly unstructured nature of communications (think emails and instant messages) have limited automation. As a result, you continue to rely on knowledge workers to extract the relevant information to feed into automated processes.

TAKE THE ROBOT OUT OF THE HUMAN

IQ Bot automates business processes that rely on semi-structured or unstructured data hidden in electronic documents, images, emails and more. IQ Bot leverages multiple AI techniques to intelligently digitize and extract data to make your RPA and/or OCR technology even more effective. IQ Bot keeps learning from corrections made by your knowledge workers, getting smarter and more accurate over time.

Typical Business Process Today

4,000 Hrs. Setup Time, <30% STP*

Business Process with IQ Bot

10x Faster Setup, 2x STP*

*Straight Through Processing; End-to-end automation without human involvement.

END-TO-END AUTOMATION

Most Intuitive

10x faster setup for the business user

Rapid Time to Value

70% STP within 4 weeks

Lowest Processing Costs

Continuously learns from human-in-the-loop feedback

Seamless Integration

No changes to existing processes or workflows

Pre-packaged Use Cases

Out-of-the-box extraction capabilities for the most common business document types

Empowers Mobile Workforce

Upload and process documents in the field via Automation Anywhere Mobile

Best-in-class Security

Bank-grade security with granular Role-based Access Control

HOW DOES IQ BOT DO IT?

IQ Bot leverages the latest machine learning (ML) techniques, such as computer vision and unsupervised learning, to read and process “dark data” in documents and emails and digitizes images and documents. It intelligently finds and extracts hidden data from large multi-page documents, even documents of low quality, saving employees countless preprocessing hours.

As an integral part of Automation Anywhere’s® intelligent Digital Workforce platform—including RPA, Bot Insight™ (embedded analytics), and Bot Store™—IQ Bot enables businesses to achieve unparalleled levels of automation.

WHY IQ BOT?

Intelligent Classification

Automatically identify, group, and separate pages of interest from multi-page documents.

Industry-Leading Extraction

Leverage latest AI technologies to ensure accurate data extraction even for low resolution and handwritten documents.

Business-User Friendly

Achieve ROI in days, not months, with 10X faster set-up, no maintenance, and easy to scale.

End-to-end Process Automation

A truly complete solution for unprecedented levels of automation.

Global Language Support

Process documents in 190 languages and localized interfaces in English, French, German, Japanese, Korean, Spanish, Portuguese, Traditional Chinese, Simplified Chinese, and more.

Learns on Job

Continuously improves through learning from user feedback getting ‘smarter’ over time.

DOCUMENT TYPES THAT IQ BOT EXCELS AT

Invoices
Mortgage Applications
Insurance Claims
Purchase Orders
Tax Forms
Financial Statements

Healthcare Forms
Standard Settlement
Instructions (SSI)
Shipping Notices
Fixed Format Documents
And many more

CASE STUDY

FORTUNE 500 TECHNOLOGY COMPANY

CHALLENGE

The company faced highly variable order to cash demand, with surges every quarter-end. They possessed a manual order to cash process involving 50 full-time staff (FTEs) performing more than 16 validations against quotes in their ERP. The company tried digitization but found the intelligent OCR solution they selected had higher set-up costs than expected. It also required manual creation of customer order form templates, that delivered inconsistent results. Troubleshooting became a burden and impacted the delivery of the outstanding customer support that the company is known for.

SOLUTION

Automating the company's order to cash process overrun with unstructured data, was a perfect match for Automation Anywhere's IQ Bot. With IQ Bot, the company has automated 60% of their order to cash process with 75% straight through processing (STP) in just five weeks. The company met its aggressive goal of concept-to-production in under 5 weeks. IQ Bot's unparalleled transparency enables rapid troubleshooting, ensuring satisfied internal and external customers.

BENEFITS

4X Faster set-up time
30 FTE's focus higher-value work
\$3 Million annual savings
75% Straight through processing
On-demand scaling

Embark on your journey towards an intelligent Digital Workforce with IQ Bot!

When employees don't have to process data manually, they can do what they do best—use their knowledge for decision making and handling of unique cases or exceptions.

About Automation Anywhere

Automation Anywhere empowers people whose ideas, thought and focus make the companies they work for great. We deliver the world's most sophisticated Digital Workforce platform making work more human by automating business processes and liberating people.
