

SOLUTION BRIEF

Next-Generation AARI—Your Helpful Automation Co-Pilot

Today's companies must move fast while dealing with continued labor shortages. The next-generation AARI to the rescue! AARI brings intelligent automation directly to employees' primary apps and boosts productivity for everyone. From customer services and sales to IT and finance & accounting, AARI helps employees get the job done faster in every department!

Unlock 30% productivity for everyone

Intelligent automation has driven more than 50% productivity improvement for top-performing companies, according to the latest *Automation Now & Next* report. Yet, most companies estimate that at least 30% of regular work can still be automated. The company-wide automation efforts are impeded by system complexity, strained IT resources, and lack of user adoption.

The next-generation AARI removes these obstacles by making automation easy to build and access. Integrated with top API management platforms, AARI accelerates low-code/no-code solution design with existing APIs. Built on the cloud-native Automation 360™ platform, AARI brings automation to employees in any web application and offloads tasks, increases productivity, and drives innovation.

Benefits

Productivity

Gain additional 30% productivity on day 1.

Speed

Empower employees to get work done faster in any web application.

Adoption

Embedded automation to minimize change management and drive a seamless experience.

Scale

Shorten the automation runway with pre-built API tasks across platforms.

The AARI magic

AARI's connected solution for any web application orchestrates across workflows and helps businesses move at the speed of customer demand. Automation developers can build faster end-to-end automation solutions by leveraging existing APIs of leading iPaaS partners such as Apigee, Workato, Boomi, and SnapLogic, as well as custom-built APIs, all in a single low-code/no-code Process Composer on Automation 360™.

With AARI, every employee can access intelligent automation from any web application. AARI provides out-of-the-box command packages for applications supporting iframes such as Salesforce, Genesys, and ServiceNow. Users of SAP, Workday, or custom applications can enjoy a seamless experience through Chrome extensions and access role-based automation for streamlined workflows.

Transform employee experiences with AARI everywhere

Embed in any web application

Surface up automations in your teams' favorite applications where they work every day.

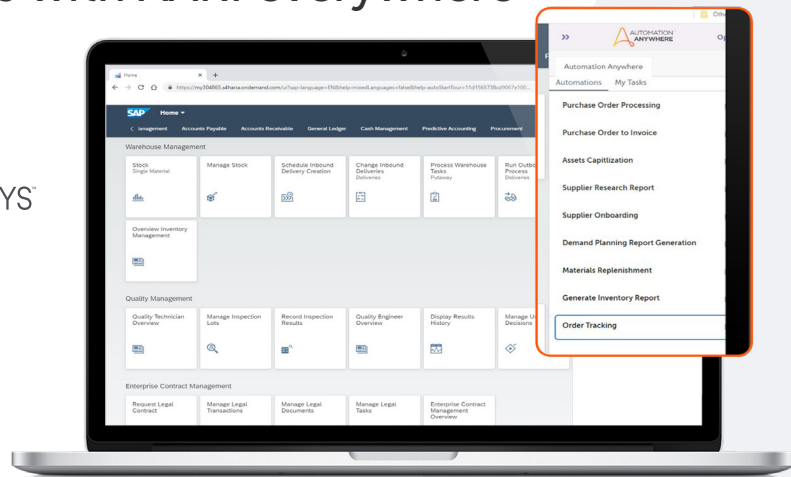

Increase productivity across any workflow

Automate any task and include a human-in-the-loop for validation, inputs, and data capture.

Accelerate change management

By connecting to where employees already engage, bypass lengthy onboarding and training.

Move faster in the automation economy

In an ever-evolving automation economy, AARI enables every employee to become more productive by making intelligent automation accessible and frictionless in any web application. As a result, everyone is empowered to turn work around faster, have more time to delight customers, and enable businesses to grow with resiliency.

Learn more about how you can simplify work everywhere with AARI.
