

# Transform Accounts Payable with AI Agents

Despite the automation inherent in ERP systems and point solutions, your AP operation still relies on manual human intervention for a variety of reasons such as too many variations in invoices across thousands of vendors, docs with hand written data or poorly scanned images, legacy systems that can't be cost effectively integrated, or exception clarifications, approval follow-ups and other communications requiring conversational engagement.

Our AI Agents can handle all of the above and more – resulting in up to 80% reduction in manual work, up to 100% accuracy and up to 90% reduction in processing time. With our AI Agents doing the bulk of the work, your AP team can focus on high value activities such as optimizing DPO, cash flow and payment timing against vendor discounts.

Up to  
**80%**  
reduction in  
manual workload

Up to  
**100%**  
elimination of processing  
errors and late fees

## The Accounts Payable AI Agent tackles operational management challenges head-on, improving efficiency, ensuring accuracy, and strengthening vendor relationships.

How it works	Key benefits
Automates end-to-end processing and timely payment of invoices, from invoice receipt to approval and payment.	<b>Avoids late payment fees</b> and optimizes supplier discounts by processing payments on a timely basis.
Streamlines payment validation and detects discrepancies with precision.	<b>Eliminates duplicate and fraudulent payments</b> by minimizing errors and automating controls.
Handles growing invoice volumes without additional resources by automating the accounts payable lifecycle.	<b>Improves operational efficiency</b> and scales seamlessly, eliminating up to 80% of manual processing.

## Agentic Process Automation offers major advantages over AP point solutions:

Easy, customizable integration with any and all systems worldwide both modern and legacy.

World-class document processing accuracy leveraging proprietary process reasoning engine trained on >300M processes.

AI Agents able to interact with internal and external stakeholders involved in AP processes in natural language via conversational AI

## It's time to soar.

Don't start from scratch. Our step-by-step guide will show you how to build and implement your own AI agents in days, not weeks.
