

RPA for Pharmaceutical Industry

Streamline Processes and Improve Patient Experience

LIFE SCIENCE OPERATIONS REDEFINED

Pharmaceutical industry leaders are deploying Digital Workforce solutions from Automation Anywhere® to drive business growth and reduce costs. The current industry transformation drives companies to establish customer-centric ecosystems, integrate digital technologies, and form new strategic alliances to continue business growth. Concurrently, pricing pressures, rising costs, and changing policies require operational optimization.

Robotic Process Automation (RPA) enables organizations to work smarter by eliminating repetitive, manual tasks. Employees' time is refocused toward value-added work, increasing productivity. RPA and cognitive automation offer tools to proactively manage uncertainties and implement strategies for the coming years.

“Human and machine—each on their own—won’t be enough to drive businesses in the coming decades. Tomorrow’s leading enterprises will be those that know how to meld the two effectively” – Accenture

Automation Anywhere RPA has delivered benefits to some of the world’s largest life sciences companies:

- Reduction in report processing time from **10 hours** to **2 hours**
- **50+** bot implemented for annual work hour savings of **\$240,000**
- **Error-free** data processing and management
- Up to **628% ROI** within **6 months**

Organizations are no longer deciding whether to use RPA but are considering expanding automation to additional processes, including:

- Pharmacovigilance processes
- Clinical trial recruitment and data management
- Drug and medical device release protocols
- HR training and certification tracking
- Compliance process management

Automation Anywhere offers security, scalability, and agility to help your organization achieve your digital transformation goals. To learn more about our solutions for Pharmaceutical and Life Sciences organizations visit us at AutomationAnywhere.com/LifeSciences to schedule a demo.

THE WORLD'S MOST DEPLOYED DIGITAL WORKFORCE PLATFORM

ROBOTIC PROCESS AUTOMATION

Enterprise RPA is automation for every rules-based, repeatable task, such as processing a transaction, manipulating data, or communication with a digital system.

COGNITIVE AUTOMATION

Cognitive automation uses AI and machine learning to automate unstructured and semi-structured processes, such as analyzing customer emails or processing invoices.

DIGITAL WORKFORCE ANALYTICS

Analytics synthesize bot-level data to generate real-time operational intelligence and actionable business insights presented through visual dashboards.

READY TO EXPERIENCE the DIGITAL WORKFORCE?

- World-leading RPA solution – **Automation Anywhere Enterprise** automates execution of well-defined tasks and processing of structured data.
- Unique, cognitive **IQ Bot™** automates the processing of unstructured data and converts it into a structured format.
- Smart analytics with **Bot Insight™** automatically aggregate and visualize data from various business systems.
